Description

ELECTRIC POWER UNIT FOR ELECTRIC DISCHARGE SURFACE TREATMENT AND METHOD OF ELECTRIC DISCHARGE SURFACE TREATMENT

Technical Field

The present invention relates to improvements in an electric power unit for electric discharge surface treatment, and also the present invention relates to improvements in a method of electric discharge surface treatment, by which a hard coat made of electrode material or a hard coat made of electrode material, which has reacted by electric discharge energy, is formed on a surface of a workpiece by energy of electric discharge when the electric discharge is generated between the electrode for electric discharge surface treatment and the workpiece.

Technical Art

Concerning the prior art by which a hard coat is formed on a surface of a workpiece so as to endow the workpiece with a corrosion resistance and abrasion resistance property, for example, Japanese Patent Laid-Open No.148615/1993 discloses a method of electric discharge surface treatment. According to the patent publication, there is provided a method of electric discharge surface
